# Is this email real?

Check it in 3 steps, for free

who-really-sent-this.streamlit.app

1. **Open** who-really-sent-this.streamlit.app (or scan the code)
2. **Copy the email's hidden lines (headers).**
   Gmail: ⋮ → Show original · Outlook.com: … → View → View message source · Yahoo: … → View raw message
3. **Paste** them in the box and click **Check this email**.

| ✅ Checks out | ⚠️ Be careful | ⛔ Likely a scam |
|---|---|---|
| Really from that address. If it asks for money or passwords, still check another way. | Something is wrong. Check with the sender another way first. | Not from who it says. Do not click, reply or pay. |

## 5 warning signs

- **Hurry or fear:** “Your account closes today.”
- **Asks for** money, gift cards, passwords or codes.
- **Name and address don't match:** “Chase Bank” from a Gmail address.
- **Look-alike address:** paypa1.com, amaz0n-support.net
- **Replies go somewhere else** than the sender.

## If it looks like a scam

- Do not click links or call numbers in the email.
- Go to the real website yourself, or call a number you trust (on your card or bill).
- Never send passwords, codes or bank details by email.
- Report it: **reportfraud.ftc.gov** and “Report phishing” in your mail app.

🔒 Nothing you paste is saved or sent anywhere. The tool never asks for a password.
A ✅ means the owner of the address sent it, not that it is safe. A hacked account still passes.
